Terminal Disclaimer

1. The terminal disclaimer filed on 7-8-05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,744,570 has been reviewed and is accepted. The terminal disclaimer has been recorded.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of a three lens element taking lens system having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of claimed elements and claimed limitations, including as recited in claims 1, 3, 4, 5 and 6, conditional statements which must be met by the combination of claimed elements', and as recited in claim 9, wherein the first and second lens elements, one is a glass meniscus lens element and the other a plastic meniscus lens element, and the third lens element is a plastic meniscus element with a specific orientation to the image side. The claims are further in condition for allowance in light of the terminal disclaimer filed on 7-8-05, as well as the certified translation of the foreign priority document, which negates the rejection under 35 U.S.C. 102(e), the Shinohara reference (U.S. Patent 6,795,253 B2).

Therefore, in light of the Applicants' arguments and/or amendments, the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
